SIMULATED NARCOTICS EXAMINATION UNIT

DRUG SEIZURE & EXAMINATION REPORT

TRAINING SIMULATION — FICTIONAL RECORD — NOT AN OFFICIAL LABORATORY CERTIFICATE

Case reference	OST/DF/2025/047	**Report reference**	LAB-SIM-047
Reporting date	25 September 2025	**Examination window**	19–24 September 2025
Requesting unit	Fictional Investigation Team	**Report status**	Training case exhibit
Examiner	A. Rahman (fictional)	**Exhibit group**	BL-047

1. Purpose and scope

This simulated examination record summarises four consignments referred for inspection following discrepancies between declared goods and recovered materials. Findings below are constructed for a training investigation and are not based on physical samples or accredited laboratory testing.

2. Source and identification of exhibits

Shipment identifiers, dates, declared descriptions and transaction references are reproduced from the instructor-provided shipment dataset. Exhibit labels and custody entries are fictional additions for the exercise.

Exhibit / Shipment	Shipment date / Ref.	Declared goods	Simulated finding	Mass*
EX-01 SHP-2025-007	2025-07-16 TXN-1047	Office stationery	Methamphetamine	6.4 kg
EX-02 SHP-2025-014	2025-08-13 TXN-1054	Electronic accessories	Heroin	11.3 kg
EX-03 SHP-2025-022	2025-09-11 TXN-1062	Machine spare parts	Cocaine	2.9 kg
EX-04 SHP-2025-029	2025-09-18 TXN-1069	Printed manuals	MDMA	7.8 kg

* Mass is the recorded quantity associated with the simulated substance finding, not an independently measured net laboratory mass. All four entries have batch reference BL-047 and status Seized.

3. Simulated examination methodology

For the purposes of this exercise, each exhibit is treated as having undergone packaging documentation, item identification and laboratory screening followed by confirmatory identification. No actual tests were performed; no analytical spectra, chromatograms, sampling records or uncertainty estimates exist for this simulation.

4. Examination findings

The simulated examination identifies methamphetamine in EX-01, heroin in EX-02, cocaine in EX-03 and MDMA in EX-04. These results are case assumptions supplied for evidence-correlation practice. They must not be represented as real analytical determinations.

SIMULATED NARCOTICS EXAMINATION UNIT

EVIDENCE HANDLING & INTERPRETATION

Case OST/DF/2025/047 | Exhibit group BL-047

5. Illustrative evidence handling register

Date	Exhibit(s)	Fictional event	Recorded by
19 Sep 2025	EX-01 to EX-04	Sealed consignments logged into training exhibit register	Intake officer
22 Sep 2025	EX-01 to EX-04	Simulated examination assigned	A. Rahman
24 Sep 2025	EX-01 to EX-04	Simulated findings entered and reviewed	A. Rahman
25 Sep 2025	EX-01 to EX-04	Training report issued	Case coordinator

6. Observations requiring correlation

The four shipment records share batch reference BL-047 and the same declared sender and receiver. Their declared descriptions differ from the simulated substance findings. The transaction references and shipment dates provide points for comparison with separately acquired digital records.

The presence of common shipment attributes may indicate an operational relationship, but does not by itself establish who prepared the records, who controlled the shipments, or whether any particular online account belongs to a person involved in criminal conduct.

7. Examiner conclusion

Within this fictional scenario, EX-01 through EX-04 are recorded as containing the respective substances listed in Section 2. The relationship between these exhibits and any externally located digital material requires independent provenance assessment, source verification and documented correlation. Identity attribution and criminal responsibility are outside the scope of this examination report.

8. Limitations

This document is an instructional simulation. Chain-of-custody entries, examiner identity, examination dates and substance findings are invented for training. No physical items were seized or tested. The shipment dataset is not a substitute for original source records or authenticated forensic evidence.
